

The Sound

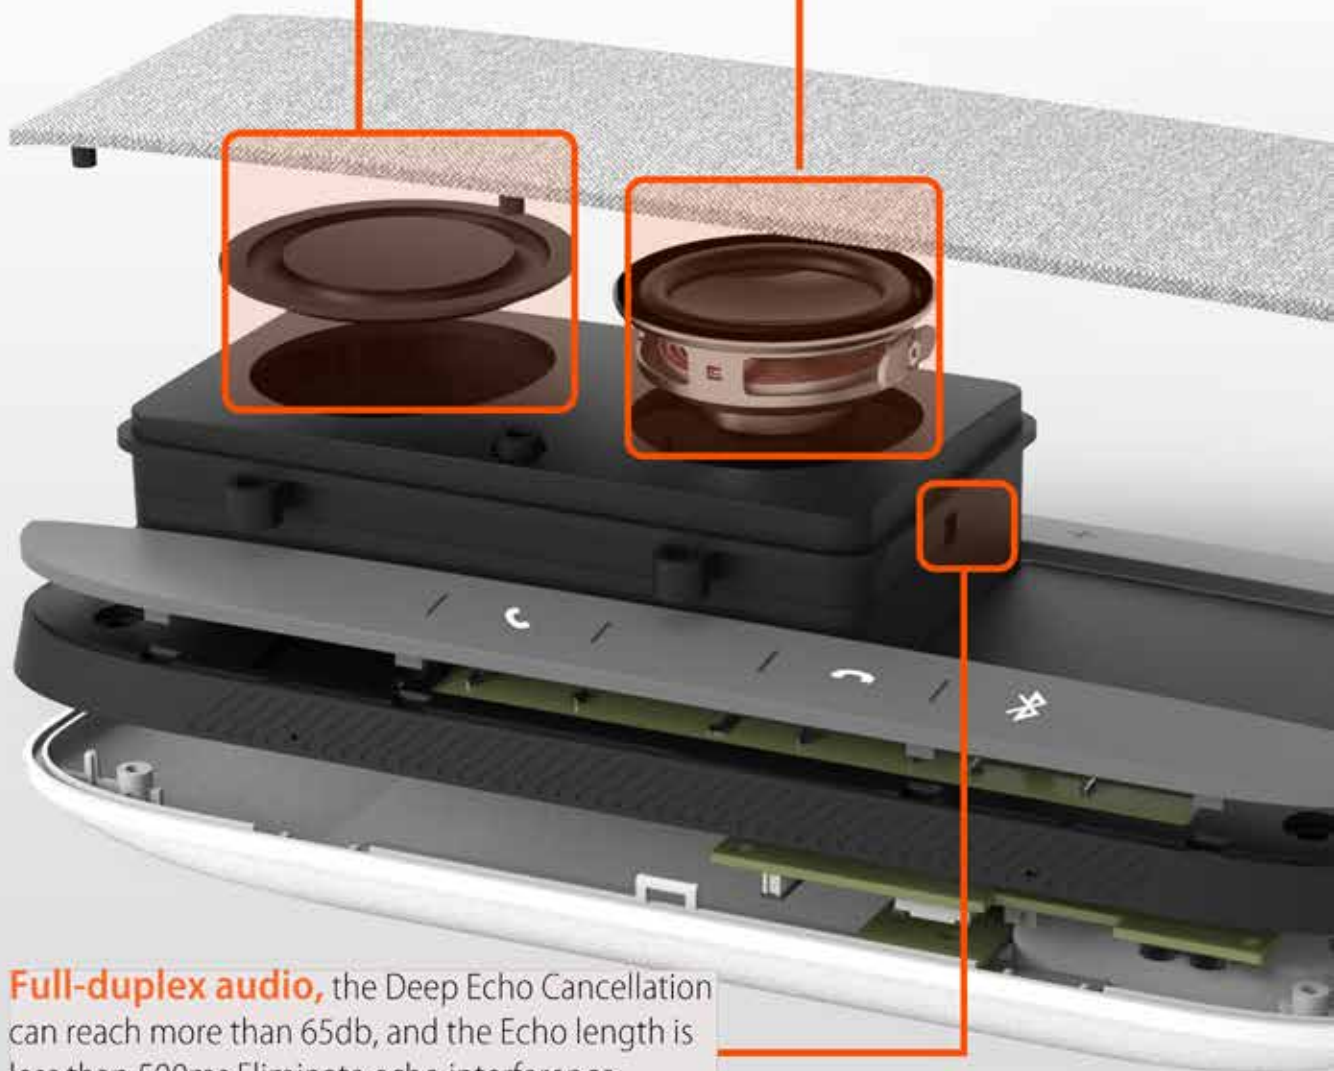

PUS-M610
USB Omnidirectional Speakerphone

High-quality Audio Streaming

Full-duplex audio, the Deep Echo Cancellation can reach more than 65db, and the Echo length is less than 500ms. It highly restores the true nature of the sound, makes the sound clearer and purer, to bring participants immersive call experience.

Double Passive diaphragm bass unit, strong bass experience

45mm full-range speaker, High-definition restoration of human voice

Full-duplex audio, the Deep Echo Cancellation can reach more than 65db, and the Echo length is less than 500ms, Eliminate echo interference

Omnidirectional Stereo Pickup

Highly sensitive 6-Mic circular steerable array ,achieving 360° omnidirectional stereo pickup, with a pickup radius of up to 6 meters, capturing every sound detail, ensuring smooth and clear conference calls, and allowing attendees to easily chat without leaving their seats.

6-Mic Circular Array

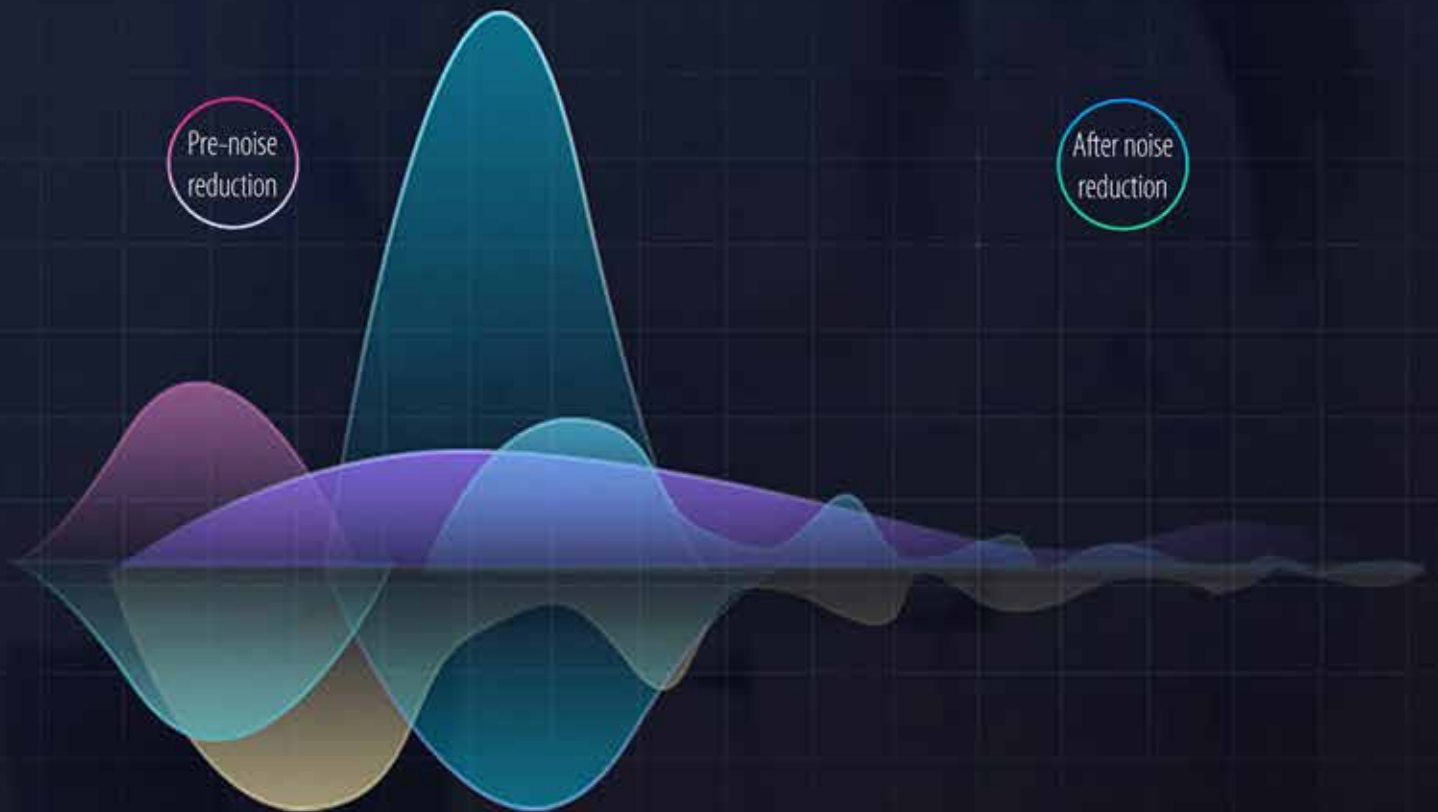

360° voice pickup

6m Voice Pickup distance

Intelligent Noise Reduction

Dynamic noise suppression, two-way noise compression, intelligent separation from the human voice from the environmental noise in the room, reduce echo interference, completely eliminate the noise, multi-track lossless mixing, automatic gain increases the voice frequency, to ensure the clear transmission of each word.

Dynamic Noise Reduction

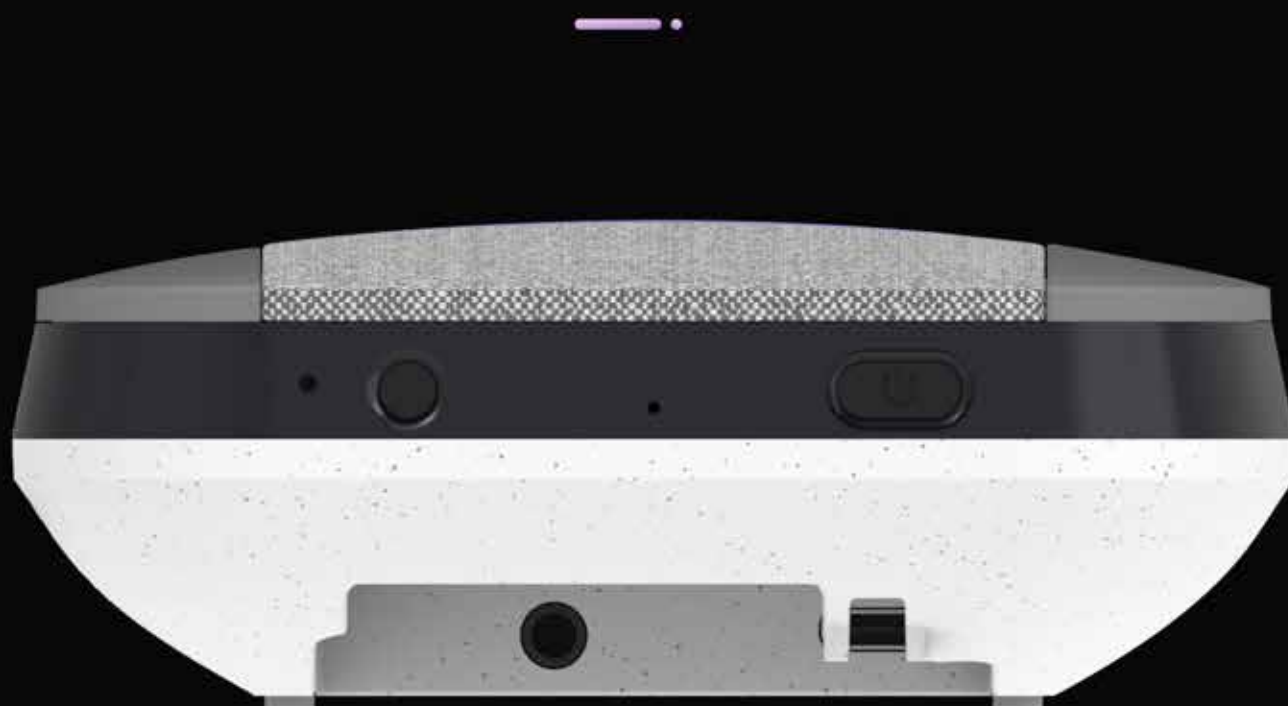

Deep echo cancellation

Automatic gain

Easy Pairing Of Terminals

Support three connection methods, USB plug and play, 3.5mm audio cable external terminal, Bluetooth wireless transmission (effective connection distance can reach 10 meters). Driven -free, compatible video conference system, multimedia communication system, and online conference platform. It can be achieved in any scenario, and remote communication can be turned on anytime, anywhere.

Bluetooth connection

USB connection

Audio connection

long-lasting Battery life

3200mAh

Trade dress, light and portable, Built -in 3200 mAh large -capacity and high -performance lithium battery, USB charging only 4 hours, battery life up to 20 hours, low -power voice reminder, the device automatically shuts down without any operation within 45 minutes.

Rich Usage Scenarios

Integrating microphones and speakers, it can meet the needs of multiple scenarios such as video conferencing, business travel, telecommuting, online education, and personal entertainment.

Video conference

Telecommuting

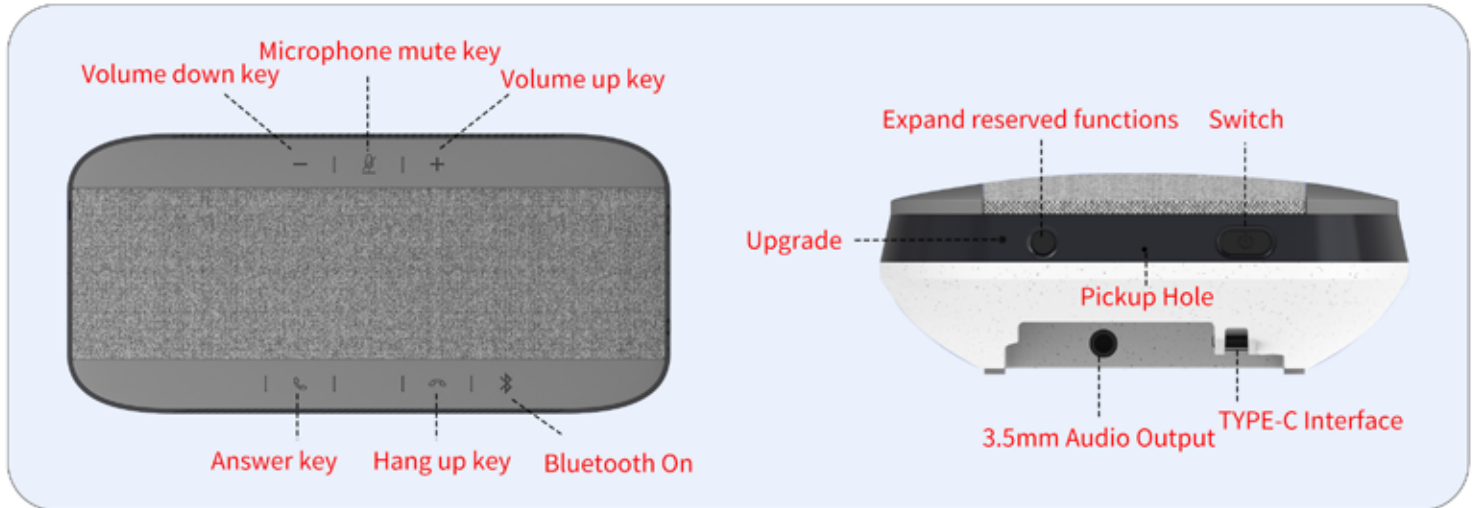

Online education

Business trip

Specification

Audio parameters		
Parameters \ Mode	Microphone	Loudspeakers
Sensitivity (1KHz)	-26dB ±2dB SPL/mv	75dB/W
Impedance (1KHz)	/	4Ω
SNR	64dB	95dB
THD	0.2%	5%
Frequency Response	100~22KHz	100~20KHz
Input Power	/	5W
Other Parameters		
Input Voltage	5V	
Max Consumption	6.2W	
Storage temperature and humidity	-10°C ~+60°C /20%~95%	
Operating temperature and humidity	-10°C ~+50°C /20%~90%	
Operating Enviroment	Indoor	
Accessories	1 * 1.8m USB2.0 Type-C cable 1* User Manual 1*Warranty Card
